OF THE
NATIONAL DEFENSE RESEARCH COMMITTEE

IN REPLY REFER TO:

REPLYING TO YOUR REFERENCE:

October 9, 1945

Mr. F. B. Wood
Radiation Laboratory
Massachusetts Institute of Technology
Cambridge, Massachusetts

Dear Mr. Wood:

As the work of the Test Equipment Group comes to a close, I should like to add my personal commendation to that of the Laboratory for the part which you have played in this important effort.

As chief of the Manuals Section of the Group, you have rendered an invaluable service. But for the availability of such manuals, much of the development and production of test equipment would have been in vain. You have shown yourself to be an excellent organizer, and have been of great assistance in the orderly cataloging of our work. The technical services which you were able to render to the manufacturers of test equipment for the Armed Forces in connection with the preparation of manuals are worthy of special note.

The development and production of measuring instruments has formed a basis for the extension of our knowledge in the heretofore unexplored region of microwaves and their applications. I feel that you can be justly proud of your contribution to this work.

May I wish you every success in the post war period.

Very sincerely yours,

F. J. Gaffney
Test Equipment Group
